Brief Profile

Established in 1961, Gabriel India Limited is the flagship company of the ANAND Group and one of India's most trusted names in automotive component manufacturing. With a legacy spanning over six decades, Gabriel has evolved from a single-product company into a market leader in ride control products, including shock absorbers, struts, and front forks, serving every major automotive segment - 2 and 3 wheelers, passenger cars, commercial vehicles, and railways.

Gabriel's products are manufactured across nine state-of-the-art plants, supported by three satellite facilities, with a cumulative production capacity of 60 million units per year. With a footprint across 25 countries and trusted partnerships with leading OEMs, including those in the growing electric vehicle (EV) segment, Gabriel continues to be at the forefront of India's mobility revolution.

As part of its growth strategy, Gabriel is actively diversifying. In 2023, it entered the sunroof systems market through a tie-up with Inalfa Roof Systems B.V., based in the Netherlands, forming Inalfa Gabriel Sunroof Systems (IGSS) to supply premium sunroof systems from its Chennai facility. Gabriel also acquired

assets from Marelli Motherson Auto Suspension Parts Private Limited (MMAS) to strengthen its suspension portfolio. Additionally, the company is entering the bicycle segment for the European market, aligning with global sustainability and urban mobility trends.

Gabriel's vision is to be among the top 5 shock absorber manufacturers in the world, driven by a strong foundation in quality, customer focus, and engineering excellence, and an open mind to new possibilities. With innovation at its core, Gabriel India is committed to powering the future of mobility - responsibly and sustainably.

Employees : 4800+

Manufacturing Facilities : 9 Manufacturing + 3 Satellite Plants

R & D Centres : Pune (PC/ CV & Railway), Hosur (2W & 3W), Genk, Belgium.

4 Technical Alliance :

- KONI BV, The Netherlands
- KYB Corporation, Spain/Japan
- Inalfa Roof Systems, Netherlands
- Gabriel Yamaha Motor Hydraulic Systems, Japan

Manufacturing Facilities

Our manufacturing facilities are spread across the country located at Pune, Nashik, Hosur, Dewas, Gurgaon, Parwanoo, Sanand. With a combined capacity of over 24 million Shock Absorbers, Struts and 2.7 million Front Forks, these facilities cater to the requirements of all segments of the market, making Gabriel the leading automotive supplier for Ride Control products in the country.

NASHIK

Key Features

- Commenced production in 1990
- Products : Shock Absorbers & Front Forks
- Segments Serviced : Two & Three Wheeler Vehicles

PARWANOO

Key Features

- Commenced production in 2007
- Products : Shock Absorbers, Struts & Front Forks
- Segments Serviced : Two Wheeler, Passenger Cars & Commercial Vehicles

KHANDSA

Key Features

- Commenced production in 2007
- Products : Shock Absorbers, Struts & Front Forks
- Segments Serviced : Two Wheelers & Passenger Cars

HOSUR

Key Features

- Commenced production in 1997
- Products : Shock Absorbers & Front Forks
- Segments Serviced : Two & Three Wheeler Vehicles

CHAKAN

Key Features

- Commenced production in 1997
- Products : Shock Absorbers & Struts
- Segments Serviced: Passenger Cars, Utility Vehicles, Commercial Vehicles & Railways

DEWAS

Key Features

- Commenced production in 1992
- Products : Shock Absorbers
- Segments Serviced : Multi Utility Vehicles, Commercial Vehicles

Reconditioned Shock Absorbers are a Safety Hazard

What is a Shock Absorber?

A Damper along with a Spring is called a Shock Absorber. A Damper is a device that absorbs the vibration of the Spring.

How does a Shock Absorber WORK?

When a vehicle runs on bumpy road, load comes on the Spring (Coil, Leaf or Torsional Bar). If the damper is not there Spring will keep on oscillating and pass these movements to the vehicle & passengers. Damper fitted parallel to Spring, absorbs these vibrations quickly & thereby protect the passengers from an uncomfortable ride.

Why a Shock Absorber can not be Reconditioned?

A Shock Absorber, consists of 42 components, many of them irreplaceable. These parts though designed for arduous continuous service give declined performance after an average of 20,000 Kms. A recent survey revealed that reconditioned shock absorbers available in the market are on an average 5-7 years old- well past their effective life.

Springs

Springs, the most important part in a Shock Absorber, show a decline in performance after a continuous, rigorous operation of approximately 20,000 Kms of service life because they gradually loose their tension. These springs are fitted inside the shock absorber and at the base of inner cylinder where they cannot be reached or replaced.

Once these springs wear out nothing can make a Shock Absorber absorb Road Shocks again.

WARRANTY

WARRANTY CLAIMS WILL BE ACCEPTED FOR THE FOLLOWING DEFECTS WHICH
COULD BE ASSOCIATED WITH MANUFACTURING

- OIL LEAKAGE • BREAKAGE
- WELDING FAILURE • PISTON SEPARATED
- JAMMED (No Piston Movement)

**WEAK and HARD' SHOCK ABSORBER
AS TESTED BY HAND IS NOT
ACCEPTED UNDER WARRANTY**
